## DETAILED ACTION

### *Drawings*

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: 32 in Fig. 3. Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.
2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the all features as recited in claims 2-14 and 16-42 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure

number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 2-14 and 16-42 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

All the features as recited in claims 2-14 and 16-42 are not seen in the drawings of the present invention. Applicant is requested to point out each of elements recited in each of claims 2-14 and 16-42 to be read on each of elements as shown in the

drawings of the present invention in order to help the examiner to understand the subject matter of the claimed invention.

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1-29 are, insofar as understood, rejected under 35 U.S.C. 103(a) as being unpatentable over Yoo et al., 5,654,930.

Yoo et al., 5,654,930, discloses the teaching of measuring the data retention time of a corresponding DRAM device in order to determine the refresh period (see lines 33-49, column 3).

What is not shown in Yoo et al., 5,654,930, is the features as recited in claims 2-14 and 16-29.

However, since all the features as recited in claims 2-14 and 16-29 are not seen in the drawings of the present invention as objected and rejected under 112, first paragraph, as set forth above, therefore, claims 2-14 and 16-29 would also have been, insofar as understood, rendered obvious under 35 USC 103(a) as being unpatentable over Yoo et al., 5,654,930.

7. Claims 30-42 are, insofar as understood, rejected under 35 U.S.C. 103(a) as being unpatentable over Frankowsky et al., 6,603,694.

Frankowsky et al., 6,603,694, discloses the teaching of adjusting the refresh rate of a DRAM device based on the measured test data retention time.

What is not shown in Frankowsky et al., 6,603,694, is all the features as recited in claims 30-42.

However, since all the features as recited in claims 30-42 are not seen in the drawings of the present invention as objected and rejected under 112, first paragraph, as set forth above, therefore, claims 30-42 would also have been, insofar as understood, rendered obvious under 35 USC 103(a) as being unpatentable over Frankowsky et al., 6,603,694.

### ***Conclusion***

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
